five(9)s EMPA Dashboard

About five(9)s

five(9)s is a highly qualified technology provider specialized in client management and process design using LANDESK technology. We are one of the largest LANDESK partners in Europe and hold platinum status. Based on our longstanding, in-depth LANDESK knowledge, five(9)s develops unique add-on software for making LANDESK solutions and infrastructures even more efficient for users from all over the world. We run a large team of excellent consultants boasting more than ten years of LANDESK expertise at the highest level.

Your LANDESK infrastructure at first sight - five(9)s Dashboard

The EMPA Dashboard is a web based frontend that lets you browse through your LANDESK infrastructure data. As the data is updated automatically in a defined time interval, you can be assured of always seeing the latest data.
See what you have
Display information about your operating systems for server and clients, your device types and hardware manufacturer to get an overview of your managed LANDESK environment.

See what is going on
Monitor your Patch-, OS or Software deployments and e.g. see trendings in your MS Office or WIN 7 rollout.
See what you have to do

EMPA Dashboard also provides charts about the security status of your clients. Based e.g. on "Missing Patches by Severity", or "Top 10 Detected Vulnerabilities" information, you can quickly decide whether there is a need for action to keep you company secure. Information about both client-side and server-side operation system usage completes EMPA Dashboard's features.

See all the details
Extend your selected Dashboard charts for a more detailed view. Drill down to chart bars, or slices to get even more information about your devices. You want to have a list of all of your managed servers? Simply click on the "Server" slice in your "Device Type" chart. You want to work with these machines? Create an automatically populated device group in LANDESK Management Suite for these nodes with a single click.

Your LANDESK system's health status
The EMPA Dashboard provides information about the health status of your LANDESK environment. Connect the EMPA Dashboard with the five(9)s Alerting Services to display the healthiness of all of your LANDESK systems like LDMS, LDSD and LDPM.

Page / Feature	Description
Dashboard View	
Charts	Configure up to twelve simultaneously displayed charts to show you all required information about your LANDESK infrastructure. Select these charts from categories like "Activity", "Inventory", "Operating System Deployments", "Security" and "Software Deployments".
Chart Drilldown	Extend your displayed chart to a more detailed view and realize the advantages of chart drilldown. E.g. take a look at the pie chart "Device Types", drill down to the "Server" slice to show a list of your managed server.
Creating Device Groups in LDMS	Drill down to your chart details to get device lists depending on the charts information and create device groups within the LANDESK Management Suite populated with these machines with a single click.
Switch your managed environment	You have more than one LANDESK Management Suite environment like parallel testing and productive core server, or a LANDESK Service Desk installation? Integrate all these systems in the five(9)s Dashboard and switch between them if needed.
Set Layout	
Set Layout	Choose one of six predefined Dashboard layouts to display 2-12 charts of different sizes at one time.
Select Charts	Choose up to 12 charts at one time (depends on your layout) out of a pool of 24 charts with different information categorized in "Activity", "Inventory", "Operating System Deployments", "Security" and "Software Deployments".
Health Dashboard	
Health Dashboard View	Connect your five(9)s Dashboard to the five(9)s Alerting Services to know how healthy your LANDESK Management Suite environment is. Display the status of your productive, quality, or test environment subdivided in your LANDESK Management Suite, or LANDESK Service Desk installations. Drill down on every monitored system to show the healthiness of hard drives, services, or essential LANDESK Management Suite functions, like policy, or inventory processing.
Admin	
Manage Systems	Connect all of your LANDESK installations like LANDESK Management Suite, LANDESK Service Desk and LANDESK Patch Manager to the five(9)s Dashboard.
Manage Roles	Define several roles for the five(9)s Dashboard to give your IT staff groups dedicated access to charts and managed systems.
