

ELIMINATE PRINT SERVERS

A blue silhouette of a person in a dynamic pose, swinging a baseball bat. The bat is positioned to smash a server rack icon. The person's shadow is cast behind them, and the server rack is a simple 3D representation of a computer tower.

PrinterLogic

Product Overview

PrinterLogic's web-based application eliminates print servers and delivers a single integrated platform that increases functionality and lowers cost. It also reduces headaches and saves valuable time by giving you central management over your entire print environment, while empowering end users to self-install their own printers.

Central Management

- Effortlessly import and migrate all printers into PrinterLogic's administrator portal
- Centrally manage end-user printers, drivers, device settings and preferences
- Automatically apply all changes made by the administrator to end-user printers
- Eliminate complicated scripting and GPO's by pushing printers according to AD user, group, OU or IP address range

Pull/Follow and Secure Printing

- Ensure print jobs are not released until the user is at printer to pick them up
- Release print jobs to any printer authorized to receive pull print jobs
- Utilize badge scan, release station or mobile device to release print jobs

Self-Service Printer Installation Portal

- Empower end-users to self-install printers with a single click
- Provide optional floor plan maps to help locate and install printers
- Significantly reduce the number of help desk calls

Simplified Remote Session and VDI Printing Environments

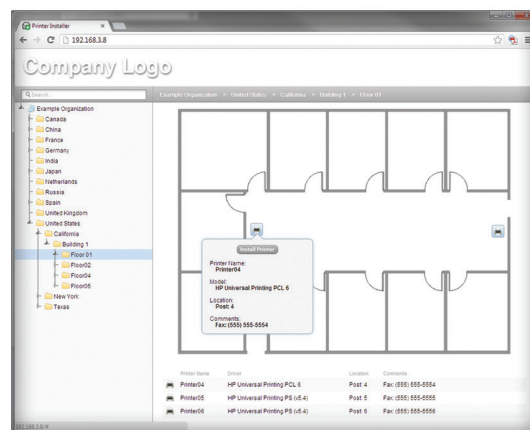

- Auto-deploy printers in sessions based on IP address of endpoint device
- Instantly create printers in the sessions and speed up login times
- Compress print jobs before they are sent across WAN connections

BYOD and Mobile Printing

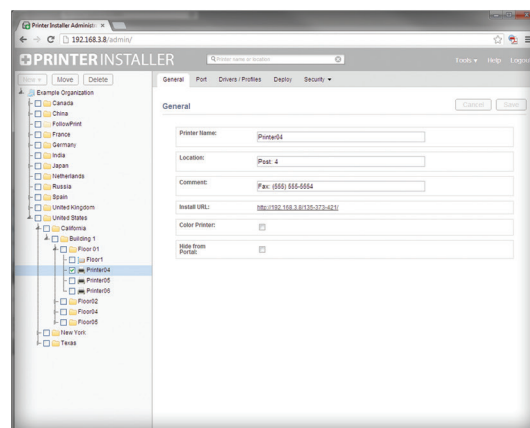

- Enable printing from iPads, tablets and smart phones
- Allow end users to bring and print from their own mobile devices
- Easily locate and print to any printer across the organization

Print Job Auditing and SNMP Monitoring

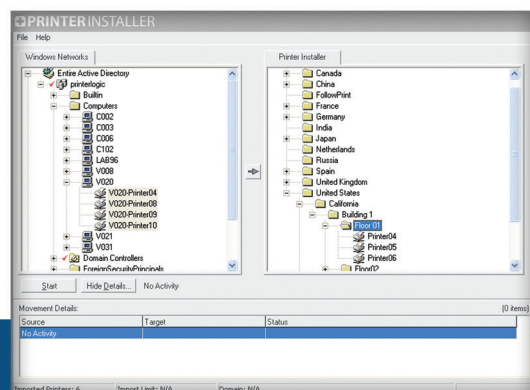

- Generate reports to proactively control costs and manage resources
- Track and audit print jobs by user, department, job title or printer
- Monitor physical printer statuses through SNMP
